DATA ANALYST | INFORMATION SYSTEMS UNDERGRADUATE

Information Systems undergraduate with hands-on experience analysing, cleaning, and visualising data using Excel, SQL, Python, Power BI, Tableau, and MySQL. Built multiple end-to-end analytics projects involving dashboard development, SQL querying, data transformation, and business reporting. Passionate about using data to solve business problems and support data-driven decision-making.

TECHNICAL SKILLS

Analytics	Excel, SQL, Python (Pandas)
Visualization	Power BI, Tableau, Excel Dashboards
Database	MySQL, Aiven MySQL
Excel	Power Query, PivotTables, XLOOKUP, Advanced Formulas
Development	Streamlit, Git, GitHub
Tools	MySQL Workbench, Jupyter Notebook, VS Code

FEATURED PROJECTS

Supermarket Sales Analytics Dashboard

SQL • MySQL • Streamlit

- Designed a relational database for supermarket sales.
- Queried sales data using joins, aggregations, and filtering.
- Built an interactive dashboard for sales and customer insights.

Chicken Republic Sales Dashboard

Excel • Power Query • PivotTables

- Cleaned and transformed raw sales data.
- Built an executive dashboard tracking KPIs, profit, and branch performance.
- Identified sales trends to support business decisions.

Netflix Data Cleaning & Analysis

Python • Pandas

- Cleaned messy datasets by handling duplicates, missing values, and inconsistent formatting.
- Prepared analysis-ready datasets for reporting and visualization.
- Performed exploratory analysis to uncover content trends.

Airbnb Data Visualization

Tableau

- Built interactive dashboards to analyze pricing, location, and listing trends.
- Presented insights using effective visual storytelling.

EDUCATION

Federal University of Technology, Akure (FUTA)

B.Tech Information Systems — 300 Level
